

CREDENDO GREEN PACKAGE: DEME HEADS FOR TAIWAN!

30/03/2023

Filed under Sustainability

Projects benefitting from the Credendo Green Package, the series of incentives launched by Credendo in 2022, are increasing and attracting companies. The Credendo Green Package offers Credendo's most favourable conditions to companies that have a positive impact on the environment.

Among the major projects that recently benefited from this opportunity is DEME's offshore wind farm installation project in Taiwan. DEME will install the pin piles and the jacket foundations for the construction of the Zhong Neng offshore wind farm, which should be operational by 2025 and generate green electricity for about 300,000 Taiwanese homes.

Credendo – Export Credit Agency covered this transaction for DEME Offshore, the offshore industry segment of the DEME Group. The global leader in marine engineering, dredging, infrastructure and environmental works is fully focused on its positive contribution to the environment and climate. Up to now, DEME Offshore has installed more than 2,700 wind turbines and contributed to more than 70 offshore wind farm projects in the world.

Credendo is keen to provide its support to such projects.
